

Product

- KAPA[®]tex is a lightweight foam board with a Polyurethane foam core and high-grade, textured cover layers
- The textured surface appears like a „canvas“ structure – this is achieved through the embossed surface with latex-impregnated paper and a primer finish
- Excellent flatness and dimensional stability
- Applicable with solvent based inks and glues
- Suitable with standard colours for all common painting techniques

Processing

- Easy processing and excellent cutting characteristics
- No crumbling of the foam core
- Printable through screen printing or direct-to-substrate digital printing
- 3D structures are easily achieved by cutting (V-groove) and folding KAPA[®]tex

Formats

| Width | x Length | Thickness |
|---------|-----------|----------------|
| 1400 mm | x 3000 mm | 5 mm and 10 mm |
| 700 mm | x 1000 mm | 5 mm |

Applications

KAPA[®]tex provides a perfect solution for the following applications:

- Substrate for advertising signs and large format prints
- Displays at the POS / POP
- Painting substrate with a 3D effect

TIP!
A range of special metal hangers as well as frames are available for KAPA[®] in order to position pictures and prints.
